### About ETF Securities

ETF Securities is a provider of Exchange Traded Products (ETFs, Commodity ETCs and Currency ETCs). The management of ETF Securities pioneered the development of ETCs, with the world's first listing of an ETC, Gold Bullion Securities in Australia and London in 2003 and then the world's first entire ETC platform which was listed on the London Stock Exchange in September 2006.

ETF Securities now offers more than 200 Exchange Traded Products (ETPs). The ETPs provide investors with a wide variety of investment strategies, with ETPs offering access to asset classes such as equities, currencies and commodities with physical, long, forward, leveraged and short exposure.

ETPs are simple to access as they are traded in five currencies (EUR, USD, GBP, JPY and AUD) and listed on nine major exchanges globally including the London Stock Exchange, the New York Stock Exchange, the Tokyo Stock Exchange, NYSE-Euronext Paris, NYSE-Euronext Amsterdam, Deutsche Börse, Borsa Italiana, the Australian Securities Exchange and the Irish Stock Exchange.

#### Risk Warnings

Securities issued by CSL, FXL and OSL are complex, structured products involving a significant degree of risk and are not suitable for all types of investor. Securities offered by the Issuers and the Company are aimed at sophisticated, professional and institutional investors. The information contained in this communication is neither an offer for sale nor a solicitation of an offer to buy securities. This communication should not be used as the basis for any investment decision. You must seek appropriate financial, tax and other advice from independent financial advisers with appropriate regulatory authorisation and qualifications. Any decision to invest should be based on the information contained in the prospectus of the relevant Issuer or the Company which includes, inter alia, information on certain risks associated with an investment. The price of any securities may go up or down and an investor may not get back the amount invested. Securities may be priced in US Dollars, Euros, or Sterling, and the value of the investment in other currencies will be affected by exchange rate movements. Investments in the securities of the Issuers or the shares of the Company which provide a short and/or leveraged exposure are only suitable for sophisticated investors who understand leveraged and compounded daily returns and are willing to magnify potential losses by comparison to investments which do not incorporate these strategies. Over periods of greater than one day, investments with a short and/or leveraged exposure do not necessarily provide investors with a return equivalent to a return from the unleveraged long or unleveraged short investments multiplied by the relevant leverage factor.

Investors should refer to the section entitled "Risk Factors" in the relevant prospectus for further details of these and other risks associated with an investment in the securities offered by the Issuers and the Company.

The relevant prospectus for each Issuer and the Company may be obtained from [www.etfsecurities.com](http://www.etfsecurities.com). Please contact ETFSM at +44 20 7448 4330 or [info@etfsecurities.com](mailto:info@etfsecurities.com) for more information.
